greater than or equal to one-half, the number of months for which an annuity is not payable as determined under the preceding sentence shall be increased by one. The annual allowable earnings amount shall be computed by totaling the amount of monthly allowable earnings as determined under the first sentence of this subdivision for each month in the calender year. For purposes of this subdivision, 'the monthly allowable earnings' shall be \$700, except that for each year after 2007, 'the monthly allowable earnings' amount shall be the larger of the amount for the previous year or the amount calculated by multiplying \$700 by the ratio of the national average wage index for the year 2 calender years before the year for which the amount is being calculated to the national average wage index for the year 2005. The amount so computed will be rounded to the next higher multiple of \$10 where such amount is a multiple of \$5 but

- 1 not of \$10 and to the nearest multiple of \$10 in any
